

VAIBHAV SALUNKE

QA Analyst & Automation Engineer

Vaibhavkrsalunke85@gmail.com | +91-7796764407 | <https://www.linkedin.com/in/vaibhav-salunke-4694a7253/> | Pune, India

PROFESSIONAL SUMMARY

QA Automation Engineer | 6+ Years of Experience

Results-driven QA Automation Engineer with 6+ years of progressive experience delivering high-quality software across Healthcare, SaaS, and Financial domains. Proficient in designing and executing robust test strategies encompassing Manual Testing, Automation Testing, API Testing, Mobile Testing, AI/ML Model Output Validation, and AI/LLM Workflow Testing. Demonstrated expertise in building scalable Playwright automation frameworks using JavaScript/TypeScript, performing REST API testing with Postman, SQL-based database validation, and executing end-to-end workflow testing across complex enterprise applications.

KEY SKILLS

- Manual & Automation Testing (Playwright, JavaScript/TypeScript)
- Functional, Regression, Smoke & End-to-End Testing
- REST API Testing & Validation (Postman)
- Database / SQL Validation (MySQL)
- Cross-Platform Mobile Testing (Android/iOS, Emulators & Simulators)
- AI/LLM Workflow & Data Enrichment Validation
- AI/ML Data Validation, Segmentation & Drift Analysis
- RPA & Kubernetes Workflow Validation
- Page Object Model (POM) Automation Framework
- CI/CD-Integrated Automated Test Execution
- Test Case Design & Management (TestRail, QASE)
- Defect Management (JIRA, Azure Test Plans)
- Agile/Scrum, SDLC & STLC
- Cross-Browser & Crash Monitoring (BrowserStack, Crashlytics)

TECHNICAL SKILLS

Test Automation	Playwright, JavaScript, TypeScript, Page Object Model (POM)
API Testing	Postman, REST APIs, Request/Response Validation, Schema Testing, Status Code Testing
AI / ML Testing	AI/ML Model Output Validation, LLM Workflow Validation, Data Enrichment Testing, RPA Job Validation, Drift Analysis, AI-Driven Healthcare QA
AI Tools	GitHub Copilot, ChatGPT, Claude, Google Gemini
Database	SQL, MySQL — Data Validation, Query Writing, Cross-System Consistency Checks
Mobile Testing	Android Studio, Xcode, Emulators, Simulators, iOS Console, BrowserStack, Crashlytics
Cloud & DevOps	Azure DevOps, Kubernetes, CI/CD Integration, Automated Test Execution Pipelines
Test Management	JIRA, TestRail, QASE, Azure Test Plans — Test Case Creation, Defect Lifecycle Management
Methodologies	Agile Scrum, SDLC, STLC, Regression, Smoke, UAT, E2E, Integration Testing
Platforms / OS	Unix, macOS, Android, iOS

PROFESSIONAL EXPERIENCE

QA Engineer

Oct 2025 – Present

Observance Solutions Pvt. Ltd., Pune

- Conduct end-to-end validation of AI-driven healthcare intake workflows across UI, APIs, databases, RPA jobs, and eClinicalWorks (eCW) integrations.
- Validate LLM-based healthcare data enrichment, medical information standardization, and workflow orchestration logic.
- Perform REST API testing using Postman for backend healthcare services and workflow integrations.
- Validate Kubernetes-based scheduled RPA job execution; detect enrichment mismatches and integration defects prior to production deployment.
- Automate patient registration workflows using Playwright with reusable, maintainable POM-based test scripts for regression execution.
- Developed and maintained Playwright automation scripts for critical regression scenarios.
- Reduced manual regression effort by 40% through automation of high-priority business workflows.

Quality Analyst

June 2022 – July 2025

Globant India Pvt. Ltd., Pune

- Led QA efforts for enterprise SaaS products across EY Virtual (legal/compliance) and SmileDirectClub (dental e-commerce).
- Developed and maintained Playwright automation test suites in JavaScript/TypeScript using the Page Object Model (POM) framework.
- Executed Functional, Regression, Smoke, Integration, and End-to-End test cycles for web and mobile (Android & iOS) applications.
- Performed REST API testing with Postman — request validation, response verification, schema checks, and status code testing.
- Managed test cases and defect lifecycle using JIRA and Azure Test Management; authored test cases from user stories in TestRail.
- Conducted cross-browser testing and mobile compatibility testing via BrowserStack, Android Studio emulators, and Xcode simulators.
- Participated in Agile ceremonies: Sprint Planning, Daily Stand-Ups, and Retrospectives.

Software Test Engineer | Wayzon Technology Services Pvt. Ltd., Pune *October 2018 – June 2022*

Wayzon Technology Services Pvt. Ltd., Pune

- Analyzed business requirements and user stories to design detailed test plans, test scenarios, and test cases for new features and enhancements.
- Prepared and maintained test data sets to support functional, regression, and integration testing cycles.
- Performed smoke and sanity testing on new builds prior to handing off to the regression cycle.
- Executed regression test suites for each release to ensure existing functionality remained unaffected by new changes.
- Collaborated with developers and business analysts during sprint planning and defect triage to clarify requirements and acceptance criteria.
- Supported User Acceptance Testing (UAT) by coordinating with stakeholders, executing UAT test cases, and addressing feedback before go-live.

KEY PROJECTS

Patient Intake System & PRISM Platform — AI/LLM + RPA Workflow Integration / AI-ML Testing

Tech Stack: *Playwright, JavaScript/TypeScript, Postman, Microsoft Azure, Kubernetes, eClinicalWorks (eCW), SQL/MySQL*

- Performed end-to-end validation of AI-driven healthcare intake workflows spanning UI, REST APIs, databases, RPA jobs, and eClinicalWorks (eCW) integrations.
- Automated patient registration and intake workflows using Playwright (JavaScript/TypeScript) with reusable, POM-based test scripts for regression execution.
- Validated LLM-based healthcare data enrichment and medical information standardization logic against source data and business rules.
- Performed REST API testing using Postman to verify workflow integrations and backend healthcare services, including request/response and status-code validation.
- Validated Kubernetes-based scheduled RPA job execution (every 30 minutes) and end-to-end workflow orchestration across connected systems.
- Conducted data validation, segmentation, and drift-analysis testing on the PRISM Platform to verify AI/ML model output accuracy and consistency.
- Identified and reported workflow failures, data-enrichment mismatches, and integration defects prior to production deployment, partnering with developers on root-cause analysis.

EY Virtual App

Aug 2023 – Jul 2025

Tech Stack: *Angular, .NET Core (ABP Framework), Microsoft Azure*

- Reviewed business requirements, functional specifications, and technical design documents, providing timely feedback to improve testability.
- Performed functional, regression, integration, and UI testing for an enterprise SaaS platform supporting legal, financial audit, and compliance management programs.
- Executed sprint-level test cycles and release validation within an Agile Scrum environment.
- Conducted API testing and backend workflow verification across platform modules, including data management and app management features.
- Logged, tracked, and triaged defects in Azure Test Plans with detailed root-cause observations and clear reproduction steps to accelerate resolution.

SmileDirectClub

Jul 2022 – Jul 2023

Tech Stack: *Python, Django, AWS Cloud, Manual & Automation QA*

- Participated in daily Scrum stand-up meetings to report testing progress and surface blockers.
- Authored and maintained test cases in TestRail based on user stories for a global dental-aligner e-commerce and 3D-printing platform.
- Performed UI, functional, integration, and cross-browser testing across Web, Android, and iOS applications.
- Executed mobile compatibility testing using Android SDK emulators and Xcode simulators across multiple device/OS configurations.

LearnDash.com

Oct 2018 – Jul 2022

- Tested a web-based training, reinforcement, and compliance management platform used by manufacturing organizations to build, assign, and track employee training programs and compliance reporting.
- Performed manual functional, regression, smoke, and end-to-end testing across the SDLC and STLC for new feature releases.
- Debugged issues, executed test suites, and analyzed results to validate fixes before release.
- Logged, tracked, and managed defects through JIRA, collaborating closely with developers to verify resolution.

EDUCATION

- MBA — Suryadatta Institute of Business Management & Technology (SIBMT), Pune
- B.E. — SSBT's College of Engineering & Technology, Jalgaon
